

10369461

Development Engineer Mechanical Design (f/m)

Your responsibilities:

- Mechanical configuration of satellites, payloads and mechanisms
- Development of mechanical designs for satellites and instrument structures
- Development of lightweight structure designs (in particular highly stable structures) employing new design concepts and materials such as fibre-reinforced composites and ceramics
- Development and documentation of mechanical designs under consideration of functional, material and manufacturing requirements and constraints
- Installation and integration studies on satellite and subsystem levels
- Generation of product definition drawings and documentation for bids and projects

Your profile:

- University degree in engineering, aeronautics or mechanical engineering
- Professional experience with construction and aeronautics (minimum of 3 years)
- Professional experience with light weight construction (minimum of 3 years)
- Detailed knowledge of CATIA V5 and MS-Office
- Fluent German and English
- Ability to work well in teams and to relate instructions to others in a supportive manner
- High level of conflict resolution skills, influencing skills and assertiveness
- Willingness to travel occasionally to Ottobrunn

Location: Immenstaad

What to expect from us:

- An interesting and diversified job
- Cordial cooperation in a great team
- Individual working models
- An above-average salary and benefits

We are looking forward to your application. Please refer to the reference number in the job description. Thank you.
