## **Business Data Architect (f/m)**

### **Your responsibilities:**

- Govern, manage and provide high-quality data for all procurement relevant reporting, analytics or business intelligence solutions
- Drive automated reporting processes and enhanced analytics and business intelligence solutions to support self-service data transparency and decision making via advanced analytics
- Build-up procurement contribution of a future digital company
- Fully accountable to support the digital initiatives (e.g. Skywise) by managing data ingestion requests and to align actively with DTO's and IT infrastructure departments as well as the requesting functions
- Fully accountable for the harmonization/rationalization of procurement data architecture strategy and to align data architecture actively with DTO's and IT infrastructure departments, as well as the recommendation of potential process or software solutions, with due consideration for the economic and/or organizational benefits
- Directly reporting to PYDAG within PY directorate in charge of procurement strategy and Services across AIRBUS Group and work for overall PYD objectives concerning the global procurement data governance & architecture with a special focus on P harmonized activities
- Accountable to provide timely, high quality and relevant data governance & architecture services and analytics to procurement leaders to support business strategy development and execution
- Accountable to initiate and lead improvement projects to support data governance and master data management in alignment with PYDM (transverse to all P activities)
- Overcome national approaches, legacy methods as well as cultural discrepancies
- Provide quick returns in a very stringent context
- Build up something new in relation to data governance supporting the digital transformation of Airbus

### **Your profile:**

- Hold a university degree in computer science (min. Bachelor)
- Over 5 years of professional experience with purchasing and project management
- General knowledge on Data Lake, Data Warehousing or SAP Business
- Good knowledge of SAP/R3
- Fluent English, French or Spanish or German would be a plus
- Good in understanding of data architectures and data structures
- Analytical and process-oriented thinking

Location: Taufkirchen

### **What to expect from us:**

- A permanent contract of employment
- Fair and performance-linked wages
- Additional social benefits, vacation and Christmas bonus
- 30 days of vacation p.a.
- Cordial cooperation in a great team with personal contacts
